

## COBRA SURFACE MOUNT MODEL

### **COBRA 1230 & COBRA II 1236 - SURFACE MOUNTED TRAFFIC SPIKE SECTION**

- GUARDIAN Traffic Systems COBRA 1230 & COBRA II 1236 Surface Mounted Models are easily installed onto asphalt or concrete with no excavation required
- Simply use a construction adhesive to secure to an asphalt or concrete surface
- Large diameter concrete anchors can be used to anchor the sections into place on a concrete surface using the existing bolt holes along the edges of the unit
- These surface mounted model traffic spike units also serve as a traffic calming speed bump
- COBRA 1230 & COBRA II 1236 units are available in easy to handle 3 foot lengths, that link together to fill your required lane width easily and quickly
- Use COBRA 1230.190 or 1236.190 end bevels to safely and attractively finish your entry and exit lane traffic spike system
- Available in Safety Red & Hot Dipped Galvanized
- All of GUARDIAN Traffic Systems COBRA traffic spike models have a latch down feature to suspend one way traffic control and allow free following traffic in both directions. This feature is designed for temporary use only.
